

# HOW EDUBOLT WORKS

## YOUR CURRICULUM

- EduBolt is a platform compatible with any curriculum.
- There's nothing extra to install on your classroom PCs.
- There's no hassling with antiquated processes such as Network Drives or Email.

## OUR SERVERS

- EduBolt allows your students to upload and run HTML, CSS, JS and PHP Files.
- You can even specify a version of PHP (5.4 to 7.1) for your class to use.
- We're Student Data Security & FERPA Compliant plus SSAE16 SOC 1 Certified.

## STEP 1 : REGISTER

- Start your free trial at EduBolt.com and you'll also get your own unique referral code.
- When schools register with your code, they get 20% off our standard \$350 rate, PLUS you will receive a \$50 check (max \$300/yr) with each fully paid referral.

## STEP 2 : GET STARTED

- Create/import your classes, assignments & students from CSV/Excel or by hand.
- EduBolt will automatically generate unique passwords for all of your students.
- Easily print off your list of students with their login credentials.

## STEP 3: USE EDUBOLT!

- Students can upload files for their assignments, run them, and turn them in.
- If your students want to continue learning at home after school, they can.
- Quickly view file submissions for each of your class assignments.
- Only you and your students can view their files' code and see them run online.
